Authorization for this examiner's amendment was given in a telephone interview with Mr. Steven C. Bruess on 03/29/2007.

Claim 1 states the limitation "with at least two input contacts in the first row and at least two input contacts in the second row being connected to the out contacts in each plug connector, and with the input contacts in the first row and in the second row being connected via the at least one printed circuit board to the output contacts in the plug connector."
